InnoVfoam B.V.

Storage tank

The InnoVfoam storage tanks are produced with high quality HDPE and are very suitable for storage of any kind of foam concentrate (for water as well).

Tanks can be delivered in all kind of sizes with the following connections/options:

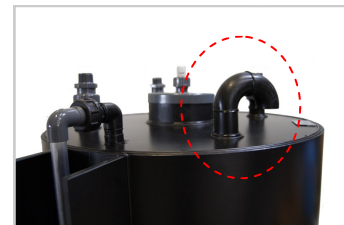

- Man/hand hole with cover
- Cable gland for level indicator (depend how many is required)
- Breather including 2 check valves
- Suction connection pipe including an internal suction tube up to just above the tank bottom with an anti-vortex plate.
- Filling connection pipe to fill the tank with water or foam concentrate, including a dip tube
- Retour connection pipe, including a dip tube
- Transparent level indicator glass with a valve and protection strips.
- Eye bolts (depend what kind of capacity tank)
- Drain connection
- Nameplate
